

Installation and operating instructions

.tiarda – Google Assistant

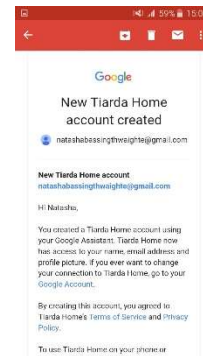

EasyControl

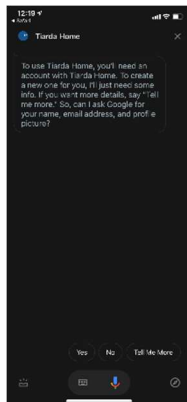

1. Open Google Assistant and say/type “Talk to Tiarda Home”

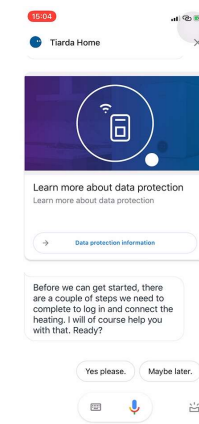

4. You will receive an e-mail from Google Home confirming that your .tiarda account has been created.

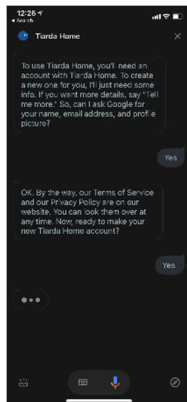

2. You will be asked whether .tiarda Home can ask Google for profile information for the creation of a .tiarda Home account. Respond with “Yes”.

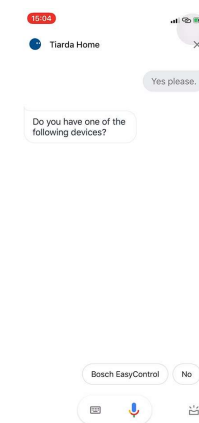

5. Thereafter, you will be asked whether you are ready to start the log in and heating connection process. Tap on “Yes please.”

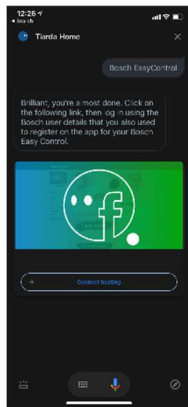

3. Next, you will be asked whether you are ready to make your new .tiarda Home account. Respond with “Yes” again.

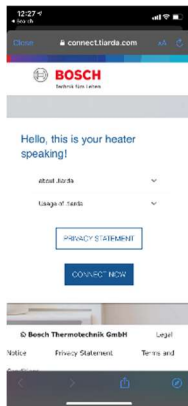

6. .tiarda will continue the conversation by asking you to confirm the device you have. Please select “Bosch EasyControl”.

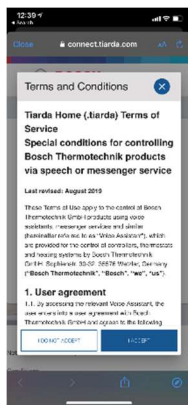

- 7. Next, to finalize the process, click on “Connect heating”.

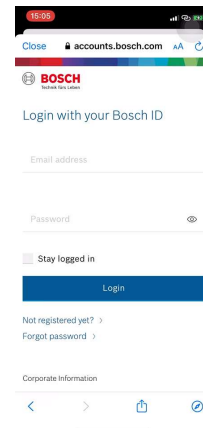

- 8. You will be lead to a Bosch page. Tap on “CONNECT NOW” to confirm the pairing of your device.

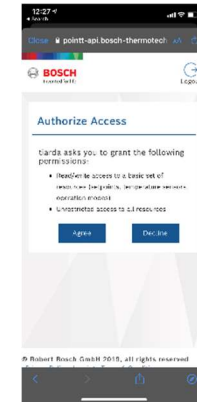

- 9. Accept the Terms and Conditions.

- 10. Login with your Bosch ID (that you created during the installation process of the EasyControl).

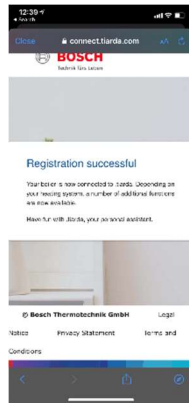

- 11. Next, you will be asked to authorize access. Click on “Agree”.

- 12. Enter your controller data and your personal password that you use with the app.

13. Connection successful! You can close this window and you will be redirected to your conversation with .tiarda.

14. You can now start talking or writing with .tiarda. An overview of all functions can be found [here](#).

Have fun with .tiarda, your personal assistant! 😊
